BRAWN GP AND NCE EXTEND TEAM SUPPLIER PARTNERSHIP

Brawn GP is pleased to announce the extension of its team supplier partnership with IT Storage and Virtualisation specialist NCE.

One of the leading names in the data storage industry, NCE joined the team for the 2006 season and introduced a Data Storage Solution offering the scalability and centralised storage management which is fundamental for the Computer Aided Design (CAD) and Computer Aided Manufacture (CAM) applications used in the design of the team's Formula One cars.

Ross Brawn, Team Principal of Brawn GP said: "We are very pleased to have extended our relationship with NCE this year. Having effective and reliable data storage is essential to a Formula One team's operations and we have seen a great deal of benefit from partnering with one of the best providers in the business over the past three years."

Jim Raven, Chief Executive Officer of NCE commented: "NCE view our relationship with the Brawn GP team as very strategic and the work that has taken place behind the scenes during the first few months of 2009 has contributed to the team's on-track success. The Storage and Virtualisation architecture that NCE have provided is paramount to the day-to-day IT operations that underpin the team's development. We look forward to continuing to develop our close working relationship with Brawn GP in the months ahead."

ENDS

Notes to Editors

Founded in 1981, NCE is established as one of the leading names in the Data Storage industry. With operation centres in Wiltshire (UK) and San Diego (USA), NCE deliver and support complete Data Storage solutions to a wide spectrum of customer types on a global basis. NCE's most recent accolades include 'Storage Reseller of the Year 2007', 'Service Company of the Year 2008' and 'Green Storage Solution of the Year 2008' awarded by the UK Storage Magazine. NCE are also nominated in the Storage category of the Microscope Aces Awards 2009. By combining the skills of the service division (offering depot and field service for storage products) with the knowledge of the solutions team who architect and integrate Data Storage and Virtualisation solutions to address the unique requirement of each business, NCE offer the complete Data Storage solution.
